# CHECKLIST.

You're 50% there.

## Suitable surface area:

- ✓ Solid brick
- ✓ Solid concrete
- ✓ Drywall with wooden pillars behind it

## Prior to drilling:

Use the pipe locator to check if there aren't any pipes or cables behind the wall.

## Don't cut off the strings:

You'll need them if you want to take down the TV from the wall.

## 1. INSTALL THE FRAMES

Place your TV on a blanket. Look in bags **M-A through M-H** **2** for the screw that fits your TV. You only need 1 set of screws.

Secure the **frames** **1** as pictured. Extra space? Place **washer (M-I)** **3** or **spacer (M-J of M-K)** **3** in between.

## 4. MARK DOWN THE WALL

Place the **spirit level (M-L)** **3** on the **wall panel** **4** and use it to draw 4 drill holes at the level of the X you drew in step 3.

## 2. MEASURE

Fasten the **wall panel** **4** to the frames and measure the distance from the bottom of the TV to the drill holes in the wall panel.

Write down the size:

cm

## 5. DRILL

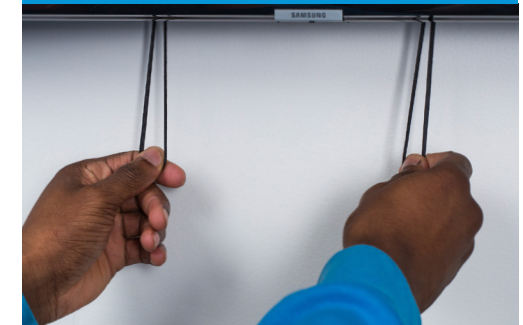

Drill with precision by first using the 5mm drill, and then the 10mm drill. Drill as deep as the **screws** **5** are in length. Hammer the **plugs** **5** into the drill holes.

## 3. DECIDE ON PLACEMENT

Decide where to place your TV on the wall and mark where the **bottom of your tv** should be. Move your pencil up by the same distance you just measured and draw an X.

## 6. HANG THE TV

Secure the **wall panel** **4** to the wall. Use the spirit level for accuracy. Lift the TV with 2 people and attach it to the wall panel. Pull down the strings to lock the television in place. Keep the strings out of the way by tying a knot or taping them in place, for example.
